Edwin Huang

Queens, NY | (929) 543-8796 | edwinhuangofficial@gmail.com | LinkedIn | GitHub

Education

NYU Tandon School of Engineering Expected May 2029

Bachelor of Science in Electrical and Computer Engineering *Brooklyn, NY*

- **Relevant Coursework:** Data Structures and Algorithms; Electrical Circuit Analysis; Electricity, Magnetism, & Fluids; Object-Oriented Programming; Linear Algebra and Differential Equations
- **SAT:** 1480 (780 Math, 700 Reading & Writing)

Projects

CompDex | *HTML, CSS, JavaScript, Python, REST API, Node.js* July 2027 – Present

- Independently developed an interactive Pokédex web application using HTML, CSS, and JavaScript, integrating the PokéAPI to dynamically display Pokémon stats, types, abilities, and sprites.
- Implemented filters for game availability, Pokémon categories, and competitive eligibility, with stat-based sorting to support team-building decisions.
- Used Python to build and maintain a Pokémon usage-rate database for competitive usage data.

HydroPlatform | *Autodesk Fusion 360, Arduino UNO, 3D Printing, Laser Cutting* January 2026 – April 2026

CAD Lead

- Designed and built a water-intake alarm clock with a 3-person team, integrating an Arduino UNO, HX711 load cell, peristaltic pump, buzzer, and LCD.
- Modeled the hexagonal enclosure, lid, and bottle components in Fusion 360; laser-cut the wooden enclosure and 3D-printed parts for fit and tolerance testing.
- Co-designed the overall system with teammates and integrated the mechanical and electronic components into a functional final prototype.

Extracurriculars

Hack3D VIP Club September 2026 – Present

Team Lead *Brooklyn, NY*

- Lead a team through weekly Hack3D challenges involving reverse engineering, CAD reconstruction, and 3D scan analysis.
- Coordinate investigative approaches and guide teammates through troubleshooting and solution development.
- Analyze CAD files, embedded metadata, and hidden clues to identify key findings and solve challenges.

Experience

BloomingLightRx November 2025 – March 2026

Pharmaceutical Technician *Flushing, NY*

- Processed 100+ prescriptions per day while maintaining accuracy, organized records, and patient-safety procedures.
- Performed weekly medication inventory audits, verified expiration dates, and maintained retail stock availability.

JFKR AAA Aviation – York College July 2024 – August 2024

STEM Program Student *Jamaica, NY*

- Researched aircraft design principles including aerodynamics, propulsion, and structural engineering.
- Designed and presented a research poster on machine-learning applications and benefits in aviation.
- Applied aerodynamic concepts in flight-simulator exercises and explored engineering career pathways in the aviation industry.

Skills

Programming: Python, JavaScript, HTML, CSS, REST API, FAST API, Git, OpenAI API, Node.js

CAD: Autodesk Fusion 360, Laser Cutting, 3D Printing
