U.S. Citizen | Queens, NY | (929) 543-8796 | edwinhuangofficial@gmail.com | LinkedIn | GitHub

Education

NYU Tandon School of Engineering Expected May 2029

Bachelor of Science in Electrical and Computer Engineering *Brooklyn, NY*

- **Relevant Coursework:** Data Structures and Algorithms; Electrical Circuit Analysis; Electricity, Magnetism, & Fluids; Linear Algebra and Differential Equations; Object-Oriented Programming(Spring 2027)
- **SAT:** 1480 (780 Math, 700 Reading & Writing)

Experience

Exar North November 2026 – Present

Software Engineer (Part Time) *Remote*

- Incoming sole developer of an iOS application.
- Responsibilities: testing, developing, and shipping versions
- Responsible for marketing the app after launch, including creating promotional videos on social media.

Projects

PokéChef | *Python, FastAPI, JavaScript, HTML/CSS, OpenAI API, REST API* September 2026 – Present

- Built an AI-powered Pokémon assistant using OpenAI function calling to retrieve game data from PokéAPI and calculate type matchups.
- Developed a FastAPI backend supporting conversational chat and AI-assisted reviews of imported Pokémon Showdown teams.

CompDex | *HTML, CSS, JavaScript, Python, REST API* July 2026 – Present

- Independently developed an interactive Pokédex web application using HTML, CSS, and JavaScript, integrating the PokéAPI to dynamically display Pokémon stats, types, abilities, and sprites.
- Implemented filters for game availability, Pokémon categories, and competitive eligibility, with stat-based sorting to support team-building decisions.

HydroPlatform | *Autodesk Fusion 360, Arduino UNO, 3D Printing, Laser Cutting* January 2026 – April 2026

CAD Lead

- Designed and built a water-intake alarm clock with a 3-person team, integrating an Arduino UNO, HX711 load cell, peristaltic pump, buzzer, and LCD.
- Modeled the hexagonal enclosure, lid, and bottle components in Fusion 360; laser-cut the wooden enclosure and 3D-printed parts for fit and tolerance testing.

Extracurriculars

Hack3D VIP Club September 2026 – Present

Team Lead *Brooklyn, NY*

- Lead a team through weekly challenges involving CAD reconstruction, 3D scan analysis, and reverse engineering.
- Coordinate investigative approaches and guide teammates through troubleshooting and developing solutions.
- Analyze 3D models, CAD files, embedded metadata, and hidden clues to identify key findings and solve challenges.

Skills

Programming: Python, JavaScript, HTML, CSS, React, Typescript, Swift, SQL

Frameworks & Tools: FastAPI, Node.js, RESTful APIs, Git, OpenAI API

Design & Fabrication: Autodesk Fusion 360, 3D Printing, Laser Cutting
